Grosse Pointe, Michigan | bgcarswell@comcast.net | 313.492.8557 | linkedin.com/in/genecarswell

EXECUTIVE PROFILE

Global operations executive, president, and board director with 30 years of experience creating enterprise value across automotive and industrial manufacturing businesses. Leads billion-dollar, multi-country operations through enterprise transformation, technology deployment, capital strategy, operating-model redesign, and board oversight of governance, audit, treasury, risk, and compliance. Trusted by boards, private-equity investors, global headquarters, OEM customers, and executive teams to deliver durable performance across the Americas and Asia.

SELECTED CAREER HIGHLIGHTS

$1B ENTERPRISE SCALE 16 manufacturing sites | 4 countries | 2,800 associates	**MARGIN TRANSFORMATION** Gross margin improved from 35% to 48%
PRODUCTIVITY AND COST $20M+ annual productivity and cost improvement	**CAPITAL EFFICIENCY** Throughput +20% | Working capital -25%
STRUCTURAL RESET $10M+ annual fixed-overhead reduction	**BOARD GOVERNANCE** Governance, audit, treasury, risk, and compliance oversight

EXECUTIVE EXPERIENCE

AGC AUTOMOTIVE AMERICAS | Vice President, Operations | Jul 2021 – Nov 2026 | *Michigan*

Promoted from Vice President, Manufacturing into an expanded enterprise mandate encompassing Manufacturing, EHS, Quality, Engineering, Tier II operations, Purchasing, Supply Chain, and OpEx transformation across the Americas. Integrates global functional strategy with regional authority and operating accountability.

- **Improved gross margin from 35% to 48% through a volume-to-value transformation while consolidating seven sites and advancing two greenfield developments. Sustained the recovery through disciplined governance, structured escalation, cross-functional alignment, and durable countermeasures.**
- **Directs operational performance, productivity, quality, compliance, capital deployment, and manufacturing strategy across a $1 billion automotive network comprising 16 manufacturing sites and 3,800 associates in the United States, Canada, Mexico, and Brazil.**
- **Sponsors advanced manufacturing strategy across traceability, digital process twins, simulation, manufacturing technology, and supply chain excellence. Improved throughput by more than 20% and reduced working capital by more than 25% by shortening lead times and strengthening process and supply-chain execution.**
- **Generated more than $20 million in annual productivity and cost improvement by standardizing business systems, expanding lean capability, footprint consolidation, deploying AI, automated guided vehicles, digital twins, simulation, and enhanced operational technology architectures. The strategy standardized lean operating systems, offset inflationary pressure, and accelerated enterprise-wide technology adoption.**
- **Built a high-performing leadership team with aligned performance targets, incentives, and accountability for growth, cost competitiveness, and continuous improvement. Strengthened cross-functional collaboration and established recognition programs that reinforced execution across the operating network.**
- **Appointed to the AGC Americas Board with oversight responsibility for governance, statutory and legal obligations, internal audit, risk and compliance, and treasury across the region. Provides assurance that regulatory, financial, and legal reporting meets company policy and regional requirements, and directs escalation of material governance matters and countermeasures to global headquarters.**

AGC INC. | Global Director, Global Safety, Quality, and Technology Office | Jan 2019 - Jul 2021 | *Tokyo, Japan*

Selected for an expatriate assignment at global headquarters to lead safety, quality, and technology improvement strategy worldwide, reporting to the CEO. Mobilized global innovation, technical resources, and product and process development capabilities to strengthen manufacturing performance and accelerate industrialization across the enterprise.

- **Led a globally distributed team responsible for technology development, industrialization, and new-product and process launches, accelerating the transition from development to worldwide production. Reduced development time by more than 50% through a global technology roadmap and cross-regional collaboration.**
- **Established a global benchmarking and best-practice network across 200 manufacturing plants, consolidating monthly performance metrics and accelerating resolution of delivery, safety, quality, and productivity issues. Reduced significant performance problems by 30% and institutionalized monthly operating reviews between regional leaders and global headquarters.**
- **Led the development and deployment of global EHS policy, minimum requirements, internal-audit structure, and a professional training network to standardize governance and strengthen controls worldwide. Reduced lost-time incident rate by more than 10% in two years through targeted policy and practice improvements.**
- **Assembled and led the global COVID-19 response task force, coordinating workforce protection, remote-work enablement, supply chain monitoring, supplier risk management, and business-continuity actions across global operations.**

BELLETECH CORPORATION | President | Dec 2016 – Nov 2026

Holds full responsibility for P&L performance, growth, customer relationships, governance, and organizational leadership while concurrently serving as an executive of AGC Automotive Americas. Leads Belletech as a wholly owned subsidiary with an independent governance structure and business model, directing differentiated service, delivery, and sequencing operations that support AGC Automotive's U.S. supply chain strategy.

- **Led acquisition of minority owner shares to unlock and align strategy, accelerate growth., leverage resources, and enhance efficiency with parent company and customers.**
- **Delivered consistent year-over-year revenue and earnings growth exceeding 10% through disciplined quality, cost competitiveness, and customer service.**
- **Led full integration of business systems, policy, and management structure aligned with parent company to leverage functional resources, support, and governance increasing speed, agility, and efficiency.**
- **Transformed service offerings and product portfolio aligned with key customer pain points to drive revenue, increase customer intimacy, and enhance margins.**

AGC AUTOMOTIVE AMERICAS | Vice President, Manufacturing | Dec 2016 - Dec 2018 | *Michigan*

Led manufacturing operations, engineering, operational excellence, plant performance, and capital deployment across North America. Reconfigured the regional operating model to strengthen governance, clarify functional accountability, and enhance local ownership and execution.

- **Reduced corporate overhead by aligning plant operations and support functions around clear regional priorities across sales, EHS, supply chain, costing, finance, and technology. Relocated the regional corporate office and consolidated the workforce into one location, simplifying the structure and reducing annual overhead and headcount costs by more than $10 million.**
- **Installed standardized management reporting and structured performance reviews across all locations, enabling the leadership team to identify variances earlier and resolve problems collaboratively across sites and functions.**
- **Established quarterly in-person forums for all site and functional leaders to shape business strategy, align priorities, strengthen cross-functional relationships, and develop leadership capability through structured learning.**
- **Directed $100 million in capital projects over two years, delivering on time and within budget to support major product launches across multiple facilities and countries. Led development and execution of a major model-change program generating $225 million in annual revenue for a global OEM customer.**
- **Established an integrated regional operating cadence linking plant leaders and support functions through shared priorities, standardized reviews, and coordinated decisions across sales, EHS, supply chain, costing, finance, and technology.**

PRIVATE EQUITY & SPECIAL SITUATIONS LEADERSHIP

PRECISION GLOBAL SYSTEMS / SHILOH INDUSTRIES / ADVANCED ASSEMBLY PRODUCTS / BLUE WATER AUTOMOTIVE SYSTEMS | Appointed Executive Operator, M&A Turnaround, Business Integration and Restructuring | Jul 2004 - Dec 2016 | *North America and Mexico*

Appointed to executive operating roles in private-equity-led and special-situations environments across North America and Mexico, leading stabilization, restructuring, recapitalization, integration, and exits. Appointments included Vice President, Precision Global Systems; Director of Operations, Shiloh Industries; Vice President, Operations, Advanced Assembly Products / Global Advanced Products; and Director of Manufacturing, Blue Water Automotive Systems.

- **Stabilization — Restored operating discipline, leadership strength, quality, and productivity across an eight-location engineered-metals enterprise spanning stamping, coil processing, laser-welded blanks, welding, and assembly.**
- **Restructuring — Consolidated two locations within 12 months and delivered a $10 million facility expansion on time and under budget, enabling closure of an underperforming site and more than $25 million in annual structural savings.**
- **Recapitalization — Improved working capital and spending controls, renegotiated commercial agreements, and supported refinancing of more than $500 million in debt to lower break-even points and restore positive free cash flow.**
- **Exit — Led sell-side diligence and execution for two divestitures, securing approvals and protecting employee, customer, and shareholder interests through closing.**

EARLIER EXECUTIVE & OPERATING EXPERIENCE

GUARDIAN AUTOMOTIVE | Operations Manager | Mar 2002 - Jul 2004 | *Warren, Michigan*

Held P&L responsibility for day-to-day, multi-site operations with more than 500 employees across injection molding, extrusion, vacuum forming, metal stamping, roll forming, painting / finishing, and complex assembly processes.

GUARDIAN INDUSTRIES | Engineering Manager | Jul 1996 - Feb 2002

Led launch and lifecycle process-improvement initiatives across multiple U.S. sites. Managed estimating, program management, tooling development, facilities, and industrial engineering resources supporting manufacturing launches for new product and processes.

EDUCATION & COMMUNITY BOARD LEADERSHIP

WALSH COLLEGE
Bachelor of Business Administration
Business Administration & Economics
1999 - 2004

GROSSE POINTE FARMS BOAT CLUB
Past Commodore and Board Member | 2009 - Present | Officer and board service for a 300+ member organization, with responsibility for governance, financial stewardship, community engagement, charitable giving, and volunteer leadership.
